Dear Darren

Thank you for a highly energetic and motivating seminar at Sunshine Beach State High School on Monday 23 March. In our year 10 cohort of students we have a number of 'difficult' students and from looking around the room I would say you had 99% participation.

Through your entertaining, informative and effective use of music and video the students learned a lot about themselves and they were able to set some clear goals for their future career development. Comments from staff and students at the school have been extremely positive and we all believed the seminar was worth the money and worth keeping it as part of the students' career development program.

Regards,

Maree Cansick
Guidance Officer (Careers)
