

Learning | Courage | Integrity | Excellence | Leadership Through Service

18 February 2013

To Whom It May Concern

We were very fortunate to have Darren Pereira work with our Year 10 girls as part of our Orientation program. He delivered the "Study Skills for Success Seminar" and we have received many positive comments from our students who were most enthusiastic about the ideas Darren presented. After speaking to the girls a couple of weeks later, they still spoke enthusiastically and could recall key aspects of the program.

Darren's presentation style was pitched at just the right level for our students who were able to relate effectively to him and clearly enjoyed the interaction. He exuded enthusiasm and passion for his topic. The learning methodologies he presented were in line with the approach we take at Toorak College and the students were able to understand and use these in their learning.

We were impressed with the ideas and strategies Darren presented which were practical and could easily be implemented by students of this age level. As a Head of Year 10, I consider we received great value from this program and would very much like to make this a regular part of our start to the year as it set the scene perfectly for the important year ahead.

The program was well paced and engaging for the students and made them realise that they can achieve effectively with the right approach and strategies. It motivated them to strive to achieve their goals.

Yours sincerely,

Andrew Williams
Head of Year 10
